

YASIN MULTANI

SENIOR iOS DEVELOPER | SOLUTION ARCHITECT

Ahmedabad, Gujarat, India | +91 81418 34322 | multani.yasin@gmail.com

PROFESSIONAL SUMMARY

Senior iOS Developer with 9+ years of experience building high-performance, scalable iOS applications using Swift and Objective-C. Strong expertise in UIKit, SwiftUI, Auto Layout, REST API integration, Alamofire, Core Data, application architecture, third-party SDK integration, Firebase, push notifications, and iOS debugging and performance optimization. Experienced in MVC, MVVM, Clean Architecture, and modular application design, with 2 years of Solution Architecture experience focused on technical design, requirement analysis, scalable solution development, and stakeholder collaboration.

TECHNICAL SKILLS

iOS: Swift, Objective-C, iOS SDK, UIKit, SwiftUI, Auto Layout

Architecture: MVC, MVVM, Clean Architecture, Modular Architecture, SOLID, Dependency Injection

Networking: REST APIs, URLSession, Alamofire, JSON, OAuth/OAuth2, SDK Integration

Data & Concurrency: Core Data, SQLite, async/await, Swift Concurrency, GCD, Combine

Testing & Performance: XCTest, Unit Testing, Xcode Debugger, Instruments, Firebase Crashlytics, Performance Optimization

Apple Platform: APNs, StoreKit, App Store Connect, TestFlight, Universal Links, Apple Sign In

Tools: Xcode, Git, GitHub, CocoaPods, Swift Package Manager, Postman, Figma

PROFESSIONAL EXPERIENCE

Solution Architect | Multidots Inc.

Oct 2024 – September 2026

- Collaborate with cross-functional teams to understand business and technical requirements, define solution architecture, and align technical solutions with business objectives.
- Design scalable, secure, and high-performance system architectures based on business requirements and available technologies.

- Participate in mobile solution discussions and technical architecture planning involving iOS, Android, and Flutter applications.
- Collaborate on mobile architecture, API integration, application workflows, and technology choices across mobile platforms.
- Lead technical discussions and contribute to solution design and architecture decisions.
- Architect and implement WordPress-based solutions, including custom themes, plugins, integrations, and performance optimization.
- Evaluate technical approaches and integrations to develop efficient solutions aligned with project requirements.
- Prepare and communicate technical solutions and architecture concepts to stakeholders.
- Leverage Claude, ChatGPT, Cursor, and Google AI tools to accelerate development, troubleshoot technical challenges, and improve workflows.
- Independently develop and experiment with AI-powered applications and development workflows from planning through execution.

INDEPENDENT iOS & AI-POWERED DEVELOPMENT PROJECTS

What to Wear Today

Independent iOS Hobby Project | Swift | Core Data | Local Notifications | AI-Assisted Development

- Independently designed and developed a Swift-based iOS application providing logic-based recommendations for daily outfit selection.
- Used Core Data for local data persistence.
- Implemented Local Notifications to support reminders and application interactions.
- Used AI-assisted development tools to accelerate feature development, troubleshoot technical challenges, and explore implementation approaches.
- Managed the development lifecycle from planning and implementation through testing and refinement.

Sr. Software Engineer – iOS | Vagaro Technologies

Nov 2022 – Jul 2024

- Worked on a US-based, product-driven salon and business management platform supporting the US, Canada, and UK markets.
- Contributed to a multi-application iOS product ecosystem supporting business and client-facing workflows.

- Developed and maintained applications across Objective-C, Swift, and SwiftUI within the same product ecosystem.
- Worked primarily on Vagaro Pro, an Objective-C-based application, contributing to feature development, maintenance, and enhancement.
- Contributed to business-specific and client-facing Swift applications and Vagaro Connect, a SwiftUI-based application.
- Developed features supporting appointment booking, payments, notifications, customer management, and business workflows.
- Integrated REST APIs, backend services, and third-party SDKs.
- Collaborated with cross-functional teams to analyze requirements, discuss technical solutions, and deliver features for international users.
- Performed debugging, crash analysis, and issue investigation using Xcode, Firebase analytics, crash reports, and application logs.
- Participated in code reviews, technical discussions, and application troubleshooting.
- Supported App Store Connect and TestFlight releases, including release troubleshooting and App Store submission-related issues.

iOS Application Developer | Coalesce Tech Solutions → HorseTech Analytics

Feb 2021 – Oct 2022

- Developed and maintained a Dubai-based iOS product supporting business and client-facing applications.
- Worked primarily with Swift, UIKit, MVC, REST APIs, and Alamofire.
- Led migration from legacy Swift versions to modern Swift and modernized legacy UI components.
- Contributed to application architecture discussions and technical decisions.
- Led frontend development activities in a co-pilot/team-lead capacity across mobile and web teams.
- Communicated directly with clients and stakeholders to understand requirements, discuss solutions, and coordinate delivery.
- Developed business-side offer-management workflows with Maker, Viewer, and Checker roles.
- Integrated REST APIs using Alamofire and worked with Core Data and backend data.
- Integrated and maintained Firebase, push notifications, and third-party SDKs.
- Served as primary developer for App Store and TestFlight releases, including release management and troubleshooting.

- Investigated and resolved application bugs, crashes, and performance issues.
- Participated in code reviews, mentoring, technical discussions, and client communication.

Independent iOS Developer / Freelancer

2020 – 2021

- Worked independently on iOS development projects while pursuing the next full-time opportunity.
- Worked directly with an American client to develop a product-listing application integrating product information from Walmart and eBay.
- Maintained and enhanced an existing meditation application, implementing new features and improving the application.
- Managed application development, maintenance, debugging, feature enhancement, and release activities.
- Prepared and published iOS applications through the Apple App Store.
- Communicated directly with clients to understand requirements, discuss technical solutions, and deliver updates.

iOS Developer | Multidots Solution Pvt. Ltd.

Dec 2013 – Feb 2020

- Worked in a service-based software development environment, delivering iOS applications for multiple international clients and products across different business domains.
- Developed iOS applications using Swift and Objective-C based on project requirements.
- Built user interfaces using UIKit, Storyboards, Auto Layout, and programmatic UI; implemented MVC architecture.
- Integrated REST APIs, URLSession, and Alamofire.
- Implemented local data persistence using Core Data and SQLite.
- Integrated Firebase Analytics, Crashlytics, Firebase services, push notifications, and third-party SDKs.
- Managed App Store and TestFlight releases, including submission and release activities.
- Investigated and resolved crashes, bugs, and performance issues.
- Participated in code reviews, technical discussions, mentoring, and team leadership.
- Worked directly with international clients on requirements, technical solutions, updates, and delivery.

Selected Application & Product Experience

- BLE-based Application — Bluetooth Low Energy functionality and iOS integration.
- Product Listing Application — Product browsing and listing workflows.
- Car Auction Platform — Canada — automotive auction workflows.
- BCODA Button Application — hardware/button interaction.
- Aurafy — iOS application development and product functionality.
- Music Feed Application — synchronized iPhone music with the application and music-feed functionality.
- Selfie TV — social/video application with short-form content experience.

EDUCATION

Bachelor of Computer Applications (BCA)

Naimisharanya College, Bhavnagar | 2010 – 2013

LANGUAGES

English | Hindi | Gujarati
